

## Enjoy a Day of Discovery!

The BC Forest Discovery Centre is a 100 acre, open-air museum with a railway. Educational programs are offered for students between the ages of 5 - 12. All programs meet Ministry of Education prescribed learning outcomes.

The programs vary in length from 1.5 to 2 hours and focus on engaging children with unique activities and meaningful learning opportunities.

Each program is led by a knowledgeable tour guide and is structured to encourage interaction and active student participation.

The Forest Heritage, Forest Ecology and O' Christmas Tree programs can be customized for students in special needs high school classes.

## Forest Heritage

### Fallers, Flunkies & Families Ages 6 - 8 / Grades 1 - 3

Children travel back in time when they visit the heritage logging camp. With a focus on community, we discover what a camp community was like in the early to mid twentieth century. Children will make a paper pinwheel as they learn how these communities had to provide for themselves in the past.

*Be a logger for a day!*

### Springboards & Swedish Fiddles Ages 9 - 12 / Grades 4 - 6

This engaging program focuses on the technology and transportation used within logging camps and communities in the early to mid twentieth century. Children learn the unique language or “lingo” that was used in logging camps.

*What are monkey blankets and cackleberries anyway?*

## Forest Ecology

### Eagles & Ecosystems Ages 6 - 8 / Grades 1 - 3

This is an exciting and educational program focused on the forest ecosystem and the animals and plants found within them. A gentle walk through the mature-growth forest leads children to the eagles’ nest and back to the school house for a tree cookie activity.

*Forest Discovery has never been so much fun!*

### Timber Stamps & Tree Rings Ages 9 - 12 / Grades 4 - 6

A walk through the mature-growth forest introduces children to the concepts of tree parts and functions, forest recycling, forest technology, and how trees are used as a resource. Their learning continues with walk through the mature-growth forest to the eagles’ nest.

*It's an experience that's a cut above!*

## Seasonal

### Oh Christmas Tree Ages 5 - 8 / Kindergarten - Grade 3

This festive program allows students to explore the evolution of the Christmas tree. Inside the historic 1905 schoolhouse students will experience how trees have changed, from candles to modern LED lights. After creating a keepsake Christmas tree ornament, the students will ride on the decorated Christmas Train.

*The excitement of heritage at Christmas time!*

### West Coast Maple Syrup Ages 9 - 12 / Grades 4 - 7

Warm up your taste buds with maple syrup made from local Bigleaf Maple trees. Students will participate in a mini-workshop on maple tapping and explore the syrup making process at the evaporator. Explore the maple tree’s role in the local ecosystem and find out which ones produce the best syrup.

*Tap into a new program!*

# Testimonials

## What did other educators think of the BC Forest Discovery Centre's programs?

"A well-planned and executed programme."

"The tour guide was very adept at drawing out questions and encouraging my students to participate in the tour and got them excited about the topic."

"We really enjoyed ourselves."

"A fun and informative day."

"Great day - beyond my expectations."

"We had a great time and learned a lot! I look forward to bringing my class again next year."
